

# Nurturing STEM Education

2022

A campaign by:

Tapas Foundation &  
Society of Women Engineers (SWE)

# Campaign Brief

Tapas Foundation with the Society of Women Engineers (SWE) hosted a motivational session promoting STEM Education among young girls.

SWE works to encourage and empower women engineers in all over the world.

---

# Interactive Session

During the session, we interacted with

350 female students

who were beaming with ambition and passion when they saw some science experiments that are a part of their daily lives at GSKV Matiyal Government School in New Delhi.

Team SWE demonstrated the experiments and also answered all their questions. Through this session, we have encouraged young girls to choose STEM education for their higher studies.

---

We would like to thank  
Ramboll India, Bechtel  
Corporation, Keysight  
Technologies and Fluor  
Corporation  
for their support throughout the  
session.
